

Geometric Heart

TIME: 60 min

MATERIALS

- White paper (card stock or printer weight)
- Ruler
- Pencil
- Sharpie
- Oil pastels (or markers, pencil crayons or crayons)

STEPS

- In the middle of the page, draw a large heart. Draw it in pencil first, then trace with a Sharpie.
- Using a ruler, make straight lines going from one edge to another. These can be vertical, horizontal or diagonal or any mix. You'll probably want to just go for it with the Sharpie but you can draw in pencil first, then go over it after with the marker.
- Choose 4 different colours: 2 for the heart and 2 for the background.
- Colour inside the heart first with two of the colours. Alternate colours so that you don't end up with two sections in the same colour next to each other.
- Now colour the outside with the other two colours. Again, alternate the colours.
