

NYE Fireworks

TIME: 20-30 min

MATERIALS

- Black construction paper
- Chalk pastels

STEPS

There aren't really specific steps for this project but I would recommend looking up some images of fireworks and talking about the shapes. What do they notice? What colours are there?

Before starting with the chalk pastel, it might be a good idea for students to practice drawing these shapes. You could do it on a scrap piece of paper, or a whiteboard.

When you're ready to go, simply use the chalk pastels right on the black construction paper to make the fireworks. I suggest working top down so that we can avoid smudges.

You can try to stabilize the chalk pastel using hairspray. It's not a guaranteed solution but it can help. It's best to use one that has a really fine mist.
