

Winter Landscape: Day 1

TIME: 30 min + 30-40 min (2 days)

MATERIAS

- White paper or card stock
- Tissue paper cut into squares
- Foam brush
- White glue with a touch of water mixed in

TEACHER PREP

- Cut tissue paper into squares. I do this with the big paper cutter and it goes quickly.
- Right before starting, you'll need to mix up a glue mixture. Mostly glue with just a tiny bit of water to thin it out.

STEPS

- Using your sponge brush, apply a thin layer of the glue mixture onto a small section of your paper/card stock.
- Now lay pieces of tissue paper onto the paper/card stock one at a time. They can overlap, but we don't want thick sections. Go slow, if you go too fast you'll end up ripping the paper.
- Dip your sponge brush back into the glue mixture and seal your pieces down. The tissue paper should look shiny.
- Now continue onto another section, glue mixture on card stock first, then apply tissue paper, then seal it.
- Continue until the background is fully filled.
- Set aside to dry.

NOTE:

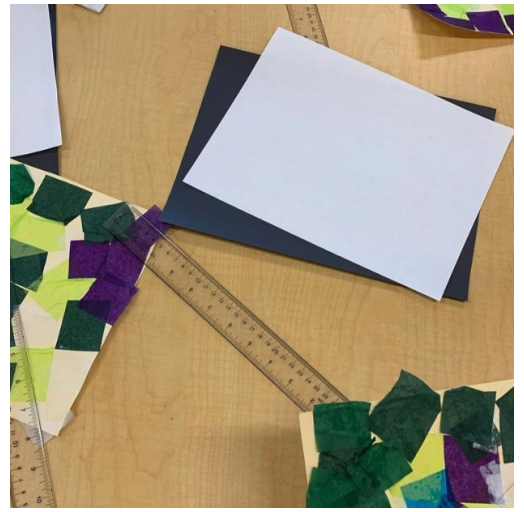

You'll probably need to press these under heavy books once dry as they'll curl up and we'll want them flat for the next step.

Winter Landscape: Day 2

MATERIALS

- Black construction paper
- White paper
- Collage paper from day 1
- Scissors
- Glue
- Pencil
- Sharpie
- Ruler
- White paint & cotton buds
OR white pastel/white crayon

STEPS

- Turn the tissue paper page upside down and draw triangles of various sizes using your pencil and ruler.
- Cut the triangles out.
- Cut some snow for the bottom of the sheet. Glue this down on the black construction paper.
- Glue your trees along the snow.
- Optionally, add some details to the trees with a Sharpie.
- Make some snowflakes using white acrylic paint and a cotton bud or a white pastel.
